Everybody LOVES Cookies!
SmartCookies combine the best tasting "good for you" ingredients with chef technique to deliver the great nutrition in your favorite cookies!
Smart Cookies captures the Cookies You Love that Love You Back!

A kitchen scene featuring a wooden rolling pin with a dark handle, a small white bowl filled with white flour, and a larger grey bowl containing yellow dough. A silver spoon is resting in the dough. The items are on a light-colored wooden surface with some flour scattered around. The background shows a white tiled wall.

How do we make SmartCookies? We start with ancient seeds and grains which contribute more protein with little carbohydrates, naturally sweet vegetable fibers and invigorating fruit oils to produce absolutely delicious and nutritionally superior cookies. Our proprietary techniques enables the good proteins to combine for taste, texture and nutrition.

**The Taste Winner with:
Higher Sweet Protein – Lower Carbs
Higher Fiber – Lower Calories
All without Glutens and Low Lectins**

THE TECHNOLOGY

DELIVERING AFFORDABLE NUTRITION

The technology is simple: Getting proteins from different sources to work together. Typically proteins are all positively charged and as we know like charges repel.

We have discovered a natural way to get these proteins to work together to form substances which become the crust, bread and other products and deliver them with high protein, low carbs, low calories, lectin free (gluten is a lectin) in foods you love.

BETTER FOR YOU NUTRITION (per 100 grams)

23 g Protein with 8 g to 10 g Net Carbs

12 g Fiber with 20% less Calories

No or Low Sugars * No Gluten * Low Lectins
